

Weekend Communique

GRADE : 4

WEEK: 15th- 19th May, 2016

Science Week: It was the week to celebrate the remarkable contributions of scientists and paying tribute to them all for engineering Science more than a just an academic subject.

The entire week focused on ingenuity that Science offers in our daily life.

The week was intelligently planned and interlinked to other subjects like literacy and Art. Our budding scientist took centre stage during Assembly followed by Science Quiz competition.

Kudos to the entire Science Department!!

Field Trip to Heritage Village and Sparky's: Students of Grade 4 are looking forward to their first field trip of the year. This educational trip will unfold great learning and joy.

The result of **End of Unit Test** will be uploaded shortly. You will receive the notification to check the result once uploaded. Students are reviewing their Unit 1 targets under teacher's guidance.

Reading Period: Our library in the new phase has been made accessible for all students. It's a proven fact that the conducive environment of the library promotes reading habits. Hence, pupils visit the library once every week where they enjoy book shopping and also read other banded books.

We request parents to monitor their reading when the books are sent home. Do ask reflective and comprehension questions based on the book read.

Have a spectacular week!
